

Jay Hoskins, PE, is a Civil Engineer with the Metropolitan St. Louis Sewer District. He works with designers, developers, and MSD's municipal co-permittees to ensure site development projects within the District meet stormwater management requirements. Mr. Hoskins is actively involved in implementing MSD's *Site Design Guidance* (a process to ensure adequate upfront stormwater planning occurs on new and redevelopment projects), *Proprietary Water Quality Products* program, and the *Landscape Guide for Stormwater BMP Design*. He received his BS in Civil Engineering from the University of Missouri at Rolla, and his MS in Environmental Engineering and Science from Clemson University, and he has 10 years of experience serving private industry and government.
