Missouri Levee & Drainage District Association  
Kansas Association for Floodplain Management

### **Education**

B.S. Agriculture  
Kansas State University

B.S. Computer Information Systems  
DeVry Institute of Technology

### **Levee Management**

My interest in levees began in 2004 when a client asked me to serve as Secretary-Treasurer for the Atherton Levee District, in Jackson County, Missouri. My curiosity about FEMA map modernization implications for levees began in 2007 and developed into my current levee certification expertise.

Atherton Levee District management delegated broad authorities to me and I became the point of contact relative to levee business. I remain in service to the Atherton Levee District as their operations and business consultant. One of my current projects is attaining FEMA accreditation of the levee.

Additional levee consulting services include the following:

- Preparation for and response to U.S. Army Corps of Engineers (USACE) inspections
- Initiatives for compliance with state statutes
- Research regarding levee charters and charter renewals
- Levee security and other risk management issues
